DETAILED ACTION

Response to Arguments

Applicant's arguments filed 6-20-07 have been fully considered but they are not persuasive. Applicant contends it would not have been obvious to modify the Toop haptics with the haptic distal ends of Blake because Blake is directed toward a different problem. Examiner disagree because Blake provides multiple benefits (improved stabilization and atraumatic benefits) which would be applicable to the Toop lens.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 8 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 8 positively recites the device within the human body which is non-statutory subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 remains rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, the option of “the stage of compression” is indefinite because it is unclear which stage of claim 4 is referred to.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toop EP 0962196 in view of Blake US PN 6425917.
2. Toop '196 disclose an intraocular lens comprising two or more compressible haptics having multiple stages of compression as claimed and provide an elliptical form when compressed (Figure 4). Toop lacks the express written disclosure of the optic being toric and the haptics having a distal part comprising a greater thickness. Blake '917 teach in figures 3A-3B an intraocular lens comprising toric optic and thicker distal parts on each haptic in order to treat patients in need of a toric optic and provide a better stabilized and atraumatic lens upon implantation.
3. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraocular lens disclosed by Toop '196 to include a toric optic and thicker distal parts on each haptic in order to treat patients in need of a toric optic and provide a better stabilized and atraumatic lens upon implantation.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
